

SYSTEMS AND METHODS FOR MANAGING INSPECTIONS

Abstract of Disclosure

A method is provided for managing inspection requirements using a network-based system. The system includes a server system coupled to a centralized database and at least one client system. The method includes receiving information relating to a plurality of components of a specific plant and storing the information into a centralized database. The method further includes cross-referencing the information received, updating the centralized database based on the information received and providing information in response to an inquiry.
